EDUCATION

University of Rochester

Bachelor of Science, Computer Science Major

Rochester, New York

Anticipated 5/2025

- GPA: 3.70 out of 4.00 - Listed on the Dean's List with Dean's Scholarship all semesters

Relevant Courses: Web Programming, Web Engineering, Database, Mobile App Development, Data Mining

EXPERIENCE

Software Engineer Intern – Salesforce

5/2024 – 8/2024

- Collaborated with the Knowledge Team members using Agile Scrum to improve Salesforce Knowledge
- Debugged the monolith code base. Written code in Java, JavaScript, TypeScript with the React framework
- Presented findings on the dangers of the current depreciation methods and proposed alternative methods
- Designed and implemented a text and coding language parser that is **currently used by thousands of users**.
- **Successfully prevented potential regression** caused by incorrect depreciation planning and documentation
- **Earned exceptional performance evaluations (3.5/4)** during the internship, with **1 extra project completed**

Rochester Human-Computer Interaction Lab – Research Assistant Intern

4/2023 – 5/2024

- Collaborated with a research team to implement websites that help K-12 teachers promote AI literacy
- Utilized problem-solving skills to create websites to monitor the efficiency of the HCI technique employed
- Wrote efficient middleware GraphQL code to connect with multiple backends in addition to RESTful APIs
- Wrote clean XML, TypeScript, React, and LESS code. **Successfully supported 40 teachers in teaching AI**

Onc.ai – Software Engineer Intern

5/2023 – 8/2023

- Worked with data team members to implement a data flow control board to measure different data KPI
- Performed daily standup (Kanban - Agile Methodology) and collaborated with cross-functional teams
- Utilized APIs from Google Cloud Platform, MongoDB, Valohai, and JavaScript to calculate different KPIs
- **Increased the pipeline's throughput by 20%**. Utilize insight to **extract 300 extra datasets** from the pipeline

LEADERSHIP EXPERIENCE

Web Manager – Anime Interest Floor

2/2022 – Current

- Implemented and maintained AIF's responsive landing page using JavaScript in React framework, HTML, CSS
- Implemented SEO optimization. The new website **increased the housing application rate by 11%**
- Collaborated with the AIF design team and publicity team to design the page. Website link: [AIF Landing Page](#)

EXTRACURRICULAR ACTIVITY

Frontend Team Lead – Melcourse CDCS Website

5/2024

- In a team, updated the University's CDCS system with biweekly standup (Agile Methodology - Scrum)
- Designed search algorithm, implemented UI designs, fixed logic bugs in TypeScript (React), HTML, CSS
- Utilized both GraphQL and RESTful APIs (Axios) to interact with different backend components
- Acquired by the University. Achieved 1200+ users in the first month of release. Website link: [Melcourse](#)

SELECTED PROJECTS

Personal MyAnimeList Website

4/2023

- Collaborated in a team to develop a website with a customized anime search engine for an organization
- Utilized JavaScript (React), HTML, and CSS with Firebase and GraphQL to build the website
- Created a fully responsive and mobile-friendly website, optimizing accessibility across various devices

DandyHack Landing Page

4/2023

- Collaborated in teams to develop landing websites for the 2024 and 2023 DandyHack Hackathons
- Utilized JavaScript (React), HTML, and CSS. Collaborated with a cross-functional team to update the websites
- **The websites received 2000+ visitors per hackathon**. Website Link: [DandyHack 2024](#)

SKILLS

- Programming Language: JavaScript, TypeScript, Java, Assembly, Python, SQL, GraphQL, CSS, HTML, PHP, Swift
- Frameworks and Tools: React, Flask, MySQL, PopSQL, NoSQL (MongoDB, Firebase), Git, GitHub
